Abstract of JP6076161

PURPOSE: To improve service for customer by providing a weather forecast data input means, weather forecast data storage means, and weather forecast data printing control means and printing the weather forecast data during a prescribed period on a receipt.

CONSTITUTION: A weather forecast data storage means 13 stores weather forecast data inputted from a weather forecast data input means 20. The weather forecast data setting selected by operating a key to make it a setting mode, and when the weather forecast data is required to change, a specific key on the keyboard 20 is used. Then, a weather forecast data printing control means, which prints the weather forecast data stored in a weather forecast data storage means RAM 13 on the receipt, consists of a CPU 11 and ROM 12. When the receipt is issued from a printer 22, the weather forecast data of the next week stored in the specific area of the RAM 13 are read and printed by confirming a weather forecast flag is turned on.
